## COLEMAN PEBBLES

Happenings of Interest in and

Around this Bustling Town.

You are Talked About

At Coleman, on Saturday, June 13,

to Mr. and Mrs. Gate, a son.

W. S. Bosworth went east on Mon-

day for a couple of weeks' holidays.

A walk is being laid along by the

bank, which will be a great improve-

ment when completed.

Much sympathy is extended to Mr.

and Mrs. Frank Leary. Their 18

months' old child died on Tuesday.

Davies & Hamer are putting down

a sidewalk from the Co-Operative

store to the Coleman Mercantile store.

J. Williams had the misfortune to

have the toe of his right finger of his

right hand crushed in the mine on

Wednesday.

Men are at work blasting and taking

out stone for the new battery on the

ovens. E. Merino has the contract for

the stone work.

D. J. Stafford, wife and two children

returned home on Saturday after

spending two weeks at the coast and

other places of interest.

Several men were arrested in "Bush

Town" charged with gambling. The

case will be heard next Tuesday, and

promises to be an interesting one.

E. L. Crane of the "Miner" staff,

seldom goes fishing without bringing

home some large specimens. A six-

pounder on Wednesday evening was

the limit.

The new bridge over the creek on

Third-street affords heaps of amuse-

ment for the children. It is quite a

novelty and they get the pleasure run-

ning up and down it.

INSTITUTIONAL CHURCH—Pastor,

Rev. T. M. Murray. Services: Sab-

bath 11 a.m. 7:30 p.m. Sabbath school

and Bible class, 2:30. Christian En-

deavor, Wednesday 8 p.m.

The International Coal & Coke Co.

have the machinery of the ground for

a new compressor building. Two

large boilers of 150 horse power each

are on the ground and other machinery

is here for the new work.

On Wednesday afternoon the staff of

the Coleman Mercantile Co. had a

pleasant picnic at Crows Nest lake.

Several commercial men were with

the party, and all thoroughly enjoyed

the afternoon, especially the fishing.

Rev. T. M. Murray returned on

Wednesday morning from Winnipeg,

where he had been attending the

annual conference of the assembly.

He will take the services as usual next

Sunday in the institutional church.

Election of officers took place on

Monday evening of the Independent

Order of Odd Fellows. Officers for

the ensuing year: Noble Grand, D.

G. Stafford; Vice Grand, Harry Clay-

ton; Financial secretary, J. Morrison;

Treasurer, John Unsworth; recording

secretary, H. S. French.

Several Chinamen were arrested last

week and charged with gambling.

The police smashed a window in their

laundry and there was a general

scramble. The police secured only 50

cents. The case was tried before

magistrates E. Disney and W. J. San-

ridge, and the celestials were

dismissed.

Government engineer McIntyre was

in town on Wednesday, looking over

the ground with a view to blasting out

the rock bluff at the west end of the

town, so as to get a peninsula run

instead of going over the hill. Mr.

McIntyre thinks removing the rock

is the best and it is expected it will

be done shortly. W. J. Sanridge is

already at work putting in a bridge

west of the town.

J. R. Annable, the noted fruit

man of Nelson, B. C., spent Tuesday

and Wednesday in town this week.

Mr. Annable thinks the Miners' Union

new hall one of the best he has seen in

the west. He says it is a credit to

Coleman and the miners. It is well

built and there was a general

particular. One thing Mr. Annable

says he is pleased to see the hall with

a good, large stage, as is one of the

principal necessities of a good hall.

Mr. Annable says that the fruit crop

in British Columbia this year will be

very large, as everything is in its

favor.

SCHOOL AND THE CURFEW

There is considerable talk around

town just now about some of the

children playing truant. This happens

in almost every place where there are

children. How to prevent the children

from playing truant is the prob-

lem. In one town in eastern Canada

the truant officer takes the offender to

school, no matter at what hour during

school time, opens the door, puts the

child in, and walks away. The teacher

does the rest. This may be a good

plan to adopt in Coleman. It is cer-

tainly something that should be done to

make the children go to school. Ratepayers

are compelled to pay the school tax,

and the children are allowed to stay

away from school. Is this fair? An-

other thing that is employing the

minds of the residents is that children,

and some of them very small, are al-

lowed to go upon the streets alone at

8, 9, and even 10 o'clock at night with-

out any one to look after them. The

fire bell could be rung as a curfew at

8 or 9:30 in the summer, and 7 or 7:30

in the winter as a warning that chil-

dren under a certain age, must go to

their homes.

## A BIG CELEBRATION

July 1st in Coleman Will be a

Day of Sports for Old and

Young. People From Blair-

more, Frank and Other Local

Towns Invited to Take Part.

That Coleman will have a day of

genuine sports goes without saying,

as the Miners' Union have taken the

matter in hand, and everybody may

be assured of receiving their money's

worth on Canada's great national hol-

day. A meeting has been held where

by arrangements were completed for

the carrying out a long and interest-

ing programme of sports on Wednes-

day, July 1st. Wm. Chalmers acted

as chairman, and A. M. Morrison was

the secretary. A committee was ap-

pointed, consisting of J. McMillan, A.

M. Morrison, Wm. Chalmers and M.

Morrison, to solicit subscriptions from

the business men, and they met with

splendid encouragement. So that now

Coleman will have a day of right,

royal sport.

There is no doubt that the miners of

Coleman can do other things besides

mine coal, and evidence of this will be

shown the night on July 1st. The

gentlemen who have the sports and

entertainment in charge, know not

defeat, and have made up their minds

to give the people of the Crows Nest

Pass, as well as Coleman, the best

day's fun they ever had.

The Coleman citizen's band will be

in attendance all day. They have lots

of new and select music, and can

promise the public to give a good ac-

count of themselves. For the past

two months the band boys have been

practicing almost nightly and are now

in good form.

The following committees were ap-

pointed: Grounds—M. Morrison, R. Dunlop,

W. Graham, H. Smith, and all the

foot ball enthusiasts to assist.

Small sports—A. M. Morrison, J.

Johnston, Wm. Chalmers.

Advertising—H. Smith, J. Rutherford.

Collectors of sports—M. Morrison.

Programme Committee—A. M. Mor-

risson, W. Johnston, Wm. Chalmers,

H. Smith, J. Rutherford.

Refreshment Committee—R. Dun-

lop, J. Moore, J. McMillan.

It was decided that admission to the

grounds be 50c. for adults, children

free.

The day's sports will be concluded

by a grand concert and ball in the

Miners' Union Hall and Opera House

in the evening. The new hall will be

a great attraction and on account of

the opening a large crowd will be

present.

The sports will be held on the square

near the new hall. It will be put in

shape of the occasion. A lot of vol-

unteer help will be given to put the

grounds in order.

Programmes will be distributed

later, giving list of sports.

Remember the date, and bring your

friends to Coleman on July 1st.

See large posters for further par-

ticulars.

Coleman, Friday, June 10, 1908.

### CANADIAN AND FOREIGN

Louis Frenchette, the Canadian poet laureate, died last week at Montreal.

The story is again circulated that the Great Northern will extend their line from Michel to Calgary.

Hon. Mr. Cross says, in connection with the establishment of District Courts in Alberta, that the government has adopted the principle of making the courts go to the people instead of the people going to the courts.

Finest in the west. W. B. Lanigan who recently returned to Winnipeg from a trip through the west said "Southern Alberta is the promise of being the first district in the west. It has the finest native grasses, the climate is milder, and a great variety of products can be obtained."

Confidence is returning. The telegraph companies at Winnipeg report that they are handling an unprecedented number of orders from western jobbers to eastern wholesale houses. This indicates a remarkable success in securing orders from western jobbers of Winnipeg and western distributing points having held back orders awaiting crop developments.

The railways expect that the freight movement west during the next two months will surpass all records. Implement agencies also report great activity.

### RAILROAD CHANGES

The contemplated changes in the track of the Crow's Nest line in this district are completed. When the work is done, it will mean the expenditure of several hundred thousand dollars. The plans for the work are completed and have been approved but nothing definite is known as yet when the work will start. The change is a part of the grade revision scheme, promulgated over a year ago, whereby the company proposes to reduce the grades on all western lines to the minimum. The plans call for the moving of the track from Brockton on the east to a little west of Blairmore and between the two points the road will be practically re-built. It will be wholly so except as to that portion running through Frank. The proposed line leaves the present track at about Brockton and runs north of the present road. The station at Pincher City will be moved north several hundred feet and the line will run a mile north of Cowley. It is said to be the intention to move the track of the Crow's Nest line to the new line. Coming further west, the line crosses to the south of the present track and instead of crossing the Old Man river at the present bridge at the falls, will keep on the bench and cross at the big bend near Henry Gibson's ranch. It then takes to the table land on the north side and comes into Bellevue through the townsite, giving Bellevue a station, and coming on to the "slide," keeps above the present track until the top of the hill is reached when it joins the present track thus dispensing altogether or practically so, with the two per cent grade of the present line. Through Frank the track will be as at present. It is said, but nearing Blairmore the line again diverges and passes through Blairmore along the bench on the north side of town. It is said that the old line will not be taken up but will be left to serve the coal mines now established along it. There has been talk of the line being changed this season but no announcement has as yet been made. It is thought likely, however, that the work may be started before summer is over. C.P.R. survey parties worked all last summer in this district, running lines preparatory to the contemplated change. The new line will be a little longer than the present one but the advantages to be gained in the matter of gradients will afford practically a level road.

### THE NOXIOUS WEEDS ACT

The extermination of weeds from Alberta farms should be the aim of all farmers of the province. According to the Noxious Weeds Act it is the duty of every owner or occupant of land to destroy all noxious weeds thereon, and if he made default in so doing he shall be guilty of an offence and on prosecution therefor by an inspector or other officer under the act shall on summary conviction be liable to a fine not exceeding \$50 and costs. An inspection of the province will commence shortly, and it may be well for all concerned to know just what is the duty of the inspectors under the Noxious Weeds Act. Any inspector finding noxious weeds growing on occupied or unoccupied lands, whether owned by individuals, corporations, railway companies or irrigation companies, may give notice to have such weeds destroyed within ten days. In case noxious weeds are not destroyed on any land pursuant to such notice given by the inspector, or in case the name or address of the owner of such land is unknown, the inspector or any

## Our Business Creed

We believe in the goods we are handling out in the first we are building up and in our ability to sell results. We believe that honest goods can be passed out to honest people by honest methods. We believe in working not weeping, not knocking, and in the pleasure of our work, we believe that a man can reasonably expect to get what he goes after, that one deed does not now is worth two planned for the future. We believe there is something doing somewhere for every man ready to do it. We believe we're ready right now.

### Alex. Cameron

Watchmaker, Optician  
and Issuer of Marriage Licenses

person or persons directed by him, may enter upon the land and destroy the weeds in such manner as the inspector may see fit. The cost of destroying weeds where notice is disregarded or where the address of the owner could not be obtained, may be recovered from the owner or occupant of the land by action in the name of the attorney general or inspector, or by distress by the inspector or his agents of any chattels in the land.

### SOLUTION IS DEATH OF WEEDS

At the provincial experimental farm at Lethbridge experiments are in progress for the destruction of weeds by spraying the affected fields with a solution of sulphate of iron. Professor Bolley of the North Dakota experimental farm, has been very successful with similar experiments. The solution attacks the leaves of all plants with a hairy or rough surface in such a manner that they soon die. The grain in the field is immune from the effects of the solution on account of the smooth surface of the stems. If this wholesale extermination of weeds can be effectively applied to all fields it will solve the weed problem in Alberta to a very great extent.

### FLAX LESS EXHAUSTING THAN WHEAT

Professor Bolley of the North Dakota government agricultural station, following the experiments of leading chemists and agriculturists, and as a result of his own biological experiments, has come to the conclusion that the flax plant is less radical in its demands upon the soil than wheat or oats. Professor Bolley is of the opinion that flax may be very profitably grown on old lands as well as new lands if a proper rotation is observed. He points out that the summer season, in the Northwest is very short and that consequently it is very desirable that the farmers should have as many different crops as possible that will mature in a single season. Flax does not require a short season crop, maturing more quickly than wheat, oats or barley, and the experiments carried on by the North Dakota government agricultural station prove that it may be made a permanent source of income to Northwest farmers. If they will grow it in rotation with other crops.

### AGRICULTURAL TENTS AT EXHIBITION

The department of agriculture is sending out circulars to the farmers of the province, calling attention to the agricultural tent which will be erected on the Calgary exhibition grounds, while the Dominion Fair is in progress. This tent will be supplied with chairs, tables and stationery, and will be for the use of farmers and stockmen for the purpose of rest and correspondence. Officials of the various branches of the department will be in attendance in this tent for the purpose of meeting the farmers and stockmen and discussing matters pertaining to their interests. Hon. W. F. Finlay, the minister of agriculture, has appointed a meeting to be held in this tent at 4 o'clock, Friday afternoon, July 3rd, for the purpose of discussing matters pertaining to live stock and legislation asked for by the various farmers' and stock growers' associations. A tent of a similar nature is to be conducted at the Edmonton exhibition on June 23rd to 26th. These convenient meeting places for farmers have served their purpose well wherever they have been a feature of exhibition, and it is expected that farmers will patronize them this year.

### REASON OF U. S. IMMIGRATION

Bruce Walker, Dominion superintendent of immigration, made the statement to a Bulletin representative this week that the increasing immigration from across the border to Canada is more than compensating for the calling off in the arrivals at the ocean ports of entry. A large percentage of the new comers from the western States are farmers who are anxious to locate in a country where they can raise the greatest number of bushels of wheat to the acre. That the provinces of Alberta and Saskatchewan offer them this boon is shown by the following comparative figures: In the year 1907, which was a lean year all round, the average yield of wheat per acre in the province of Alberta was 22.20 bushels, while in Saskatchewan the average yield per acre was 16.17 bushels. These figures are taken from the reports of the agriculture de-

partments of the provinces and are officially correct. The average yield of wheat per acre in the same year in Kansas was 5.8 bushels, in Minnesota 13.0 bushels, in North Dakota 11.2 bushels, in Nebraska 12.9 bushels and 12.8 bushels in the state of Iowa. Land in almost any of these states will sell at \$150 to \$200 per acre, and the best of agricultural land can be bought in Alberta at from \$10 to \$20 per acre. This shows that while present conditions exist, Alberta will continue to be the destination of thousands of the best American farmers.—Edmonton Bulletin.

### ENORMOUS COPPER DEPOSIT FOUND

PRINCE ALBERT, Sask., June 18.—There is a great excitement here over the discovery of a huge copper deposit about 220 miles north on the shores of Lake Laronge. The lead is 400 yards wide and runs back three miles, between two granite walls showing 40 pounds of copper to the ton. The deposit is on the southern fringe of the rocky northland just across Lake Laronge and near a huge coal deposit owned by the G. T. P. Old miners say the indications are that a second Butte has been discovered.

### BLAIRMORE

W. McKay of Salmon Arm, spent Sunday with his old friend, Harry Howard.

D. C. Drain has returned from a business trip to Spokane. He looks quite refreshed.

We understand that, I. Pelletier is very jubilant over the way his lots are selling in the Blairmore townsite.

The road to Coleman along the Old Man river, along the flat, is still covered in many places by running water.

Archie McLeod is busy with the ranchers of the prairie. He is wise to take advantage of the splendid crop outlook.

Wolscholine Bros. of the Crystal dairy, have dissolved partnership. W. Wolscholine is buying his brother's interests.

Mrs. John Macdonald, wife of John Macdonald, secretary of the Miners' Union, left last Sunday on an extended trip to Winnipeg.

Three cheers for Capt. Beebe, the chairman of the council, who has shown such great interest in making good the roads here.

The two walks are now being put down by contractors Frier & Sinclair. This is a step in the right direction and a blessing to Blairmore.

The sheep belonging to P. Burns & Co. and two cows belonging to Wolscholine Bros. were killed near McLane's mill Sunday last.

W. J. Jackson and wife of Greenwood, have been visiting his brother George of this village. Mr. Jackson is on his way to Fort William, where he intends to make his home.

The boys in general miss Charley Middleton's genial face among them. His departure for Lethbridge the other day meant a distinct loss to the football team. He was a splendid goal.

A large congregation listened to the sermon preached on Sunday night by Rev. J. Sergeant in the mission church. His departure for Lethbridge having just returned from the convention at Medicine Hat was in the best of spirits and much inspired.

Blairmore with her usual steady plod still goes on and the scenery just now is grand, altogether the environment such as should tempt the visitor. Fishing, too, is good and people are constantly seen with smiling faces carrying home their catch.

The home of Paul Thipadeau and wife has been visited with their 9-year-old daughter (the eldest of six), is lying at the point of death after six weeks of very serious illness. A little comfort and cheer could be given the faithful mother and suffering child, who have been isolated so long, by a kindly visit.

McLaren's saw mill is again in operation after the lay off occasioned by the high water in the river. The letter day in the line of base ball recently. They started out by trimming Blairmore 13 to 11, and immediately after while in the harness, they beat Coleman 6 to 4. The Oracle says Murphy's unmerciful slugging is responsible for the victory.

Mr. Murphy will be prevented from participating in games in the future; he is too expensive. Whenever he hits the ball he loses it.

### HOTEL MEN ORGANIZING

It is rumored, and there are many signs of truth in the rumor, that the hotel men are working hard to perfect an organization that is to be used in the next provincial election against Hon. C. W. Cross and the members of the Legislature for their action in passing the ten o'clock closing amendment. Credence is given to the story from the fact that the solicitor of the Licensed Victuallers' Association, H. A. Mackie, has been abroad in the province to inspire the conception of such a scheme and has been promised a considerable fund of money to effect the success of the plan. Recently it is said, by papers friendly to Mr. Cross, Mr. Mackie obtained considerable notoriety in an address before the Conservative association of Edmonton, by stating that the hotel men did not require railway competition.

## The Hissar Emerald.

By CLARISSA MACKIE.

Copyrighted, 1902, by the Associated Literary Press.

Lamson blew a cloud of smoke into the air and, with meditative eyes, watched it disperse.

"And the emerald," repeated Coleman eagerly as he fingered the contents of his friend's gem cabinet—"I don't see the Hissar emerald. What has become of it? That was the gem of your collection."

Lamson leaned forward and drew out the lower tray of the cabinet. From an assortment of small leather cases thrown carelessly together he took one and gave it to Coleman.

"There is the Hissar emerald," he said quietly.

Coleman pressed the spring and as the lid flew up uttered a stifled cry.

"Why—why," he stammered excitedly, "this is not the Hissar!" He paused interrogatively.

"It is the Hissar emerald and none other," returned Lamson, speaking with curious deliberation and distinctness. He took the case from his visitor's hand and shook the huge stone into his palm.

"It is like green glass," muttered Coleman, staring stupidly.

A piece of green stone as large as an almond, oval in shape, set in a handsome gold mount, lay in the palm of his hand.

"You are joking," said Coleman, sitting back in his chair and looking keenly at his host.

"I wish it were a joke," said Lamson ruefully as he replaced the jewel in the case and laid it upon the table.

"I wish you would tell me about it, old man," remarked Coleman impatiently, lighting another cigarette. "Tell me about the transformation of one of the most famous jewels of the world into worthless glass."

"Of course you know its history," Coleman began, settling back in his chair. "You know I purchased it from an old chap in Bombay for a ridiculous price—thirty gold rupees—and the man seemed to be much relieved to be rid of the stone. You know it was in my possession for ten years after my return from India, for your color and frequently admired its extraordinary brilliancy."

Coleman nodded.

"Three years ago I was in Paris," continued Lamson, "I had the emerald with me. I was seated at a table for tea. Several weeks elapsed before I found time to visit a goldsmith. I cannot recollect what he said to me, but he seemed to be much relieved to be rid of the stone. You know it was in my possession for ten years after my return from India, for your color and frequently admired its extraordinary brilliancy."

Coleman nodded.

## Red Blood Good Health

Spring blood is thin and watery until Dr. A. W. Chase's Nerve Food is used.

Red blood is the foundation of health and strength.

The same parts of the blood which give it color—the red corpuscles—also contain the elements which sustain and invigorate the body and its organs.

It is because the blood is thin and watery in the spring that nearly everybody requires a blood-builder and restorative.

Now what Dr. A. W. Chase's Nerve Food does is to increase the number of red corpuscles in the blood or in other words to make the blood red and richer in the elements which go to build up new cells and tissues to replace those wasted by disease or in the process of living.

Redden the blood by the use of Dr. A. W. Chase's Nerve Food and let it build itself from the low level of health which leaves you tired and languid and an easy victim of consumption or some form of wasting or contagious disease.

The portrait and signature of the famous Receipt Book author, A. W. Chase, M.D., are on every bottle of Nerve Food, at all dealers or Edman, Bates & Co., Toronto, Ont.

A Concensus of Opinion.

On the way to the office of his publishers one crisp fall morning, James Whitcomb Riley met an unusually large number of acquaintances. He commented conventionally upon the fine weather. This unassuming applause amused him. When greeted at the office with "Nice day, Mr. Riley," he smiled broadly.

"Yes," he agreed. "Yes, I've heard it very highly spoken of."

In the treatment of summer complaints the most effective remedy that can be used is Dr. J. D. Kellogg's Dysentery Cordial. It is a standard preparation and many people employ it in preference to other remedies. It is a highly concentrated medicine and its sedative and curative qualities are beyond question. It has been a popular medicine for many years and thousands can attest its superior qualities in overcoming dysentery and kindred complaints.

"John, do you love me?"

"Do you adore me?"

"I adore you."

"Will you always love me?"

"You have been and gone and ordered sent home now?"—Louisville Courier-Journal.

BABY'S TEETHING TIME IS A TROUBLESOME TIME.

When baby is teething the whole household is upset. The tender little child is fussy and irritable, the poor little child suffers and often cries day and night, wearing the mother out and keeping the rest of the family on edge. The trouble is that Baby's Own Tablets are used there is no such worry. The Tablets allay the fever, soothe the irritation, and bring the teeth through painlessly. Mrs. S. Williams, St. Joseph, Ont., says: "My little boy suffered terribly when cutting his teeth and the doctor could do nothing for him. I got a box of Baby's Own Tablets and they did him so much good that I cannot say enough in their favor. You may be sure that I always keep the Tablets in the house now."

Hard and soft corns both yield to Holloway's Corn Cure, which is entirely safe to use, and certain and satisfactory in its action.

"My good woman, don't you know that repeating is a serious thing?"

"Judge, I had to do so. Both lady candidates asked for my vote. I didn't know how to refuse either of them."—Washington Star.

Minard's Liniment, used by Physicians.

Adam looked at his helpmeet thoughtfully.

"Well," he said, in his emphatic way, "I'm certainly one honor that is indispensible yours, my dear."

"And what is that, Ad?" queried his first mother.

"Adam didn't smile."

"Nobody can dispute the claim that you are the first lady in the land," he said.—Philadelphia Telegraph.

What a wonder you got any Gorgonzola cheese?

"Is it very nice and white?"

"Yes, sir; very white."

"And good and hard in the middle?"

"Oh, yes, sir. Stone hard."

"Thanks. Gorgonzola cheese ought to be green and very soft."—Everybody's Magazine.

## SHAKESPEARE'S TOMB.

It Would Be Desecrators and the Poet's Imprecation.

The fact that would be desecrators of Shakespeare's tomb have not dared to risk the falling of the curse invoked in the lines cut upon his tomb is a striking testimony to the powerful effect upon mankind of such an imprecation.

J. O. Halliwell-Phillips, writing in the eighties, said:

"The nearest approach to an excavation in the grave of Shakespeare was made in the summer of the year 1796 in digging a vault in the immediate locality, when an opening appeared which was presumed to indicate the commencement of the site of the bard's remains. The most scrupulous care, however, was taken not to disturb the neighboring earth in the slightest degree, the clerk having been placed upon the spot, and the shovel, there till the burial of the shovel, was compelled to prevent any one making an examination. No relics whatever were visible through the small opening that thus presented the view into the chamber of the dead, not in a vault, the great probability is that dust alone remains. It is not many years since a phalanx of trouble makers, lanterns and spades in hand, assembled in the churchyard of night, intent on disobeying the solemn injunction that the bones of Shakespeare were not to be disturbed. The attempt was made, but the number of the last moment refused to incur the warning condemnation, and so the design was happily abandoned."

A correspondent of the London Athenaeum wrote in 1887: "I remember on a visit to the grave of Shakespeare in 1827 or 1828 remarking that it was little creditable to the authorities that the bones of the poet, which had been allowed to fall into such decay, for I could see into the grave through the hole formed by the sinking of the stones. The reply was that, 'on account of the ancient custom inscribed on the tomb, no workmen could be persuaded to meddle with it.'"

An earlier incident is thus set forth by a contributor to the Monthly Magazine of Feb. 1, 1818:

"Notwithstanding the anathema pronounced by the bard on any disturber of his bones, the church wardens were so negligent a few years ago as to suffer the sexton in digging the adjoining grave of Dr. Davenport to break a large cavity into the tomb of Shakespeare. Mr. — told the writer that he was excited by curiosity to push his head and shoulders through the cavity, that he saw the remains of the bard and that he could easily have brought away his skull, but was deterred from doing so by the poet's invoked on any one who disturbed his remains."

The attempt at a later day to meddle with the tomb had no more effective ending.

South American Animals.

Many curious animals haunt the marshy margins of South American rivers of the pampas. Frogs big and ferocious (the carapayaras), given to making vicious screams when closely approached; the capybara, a cavy contented with the bulk of the sheep; the huge capybara rat and the swarthy tapir are frequently seen. Along the forest margins troops of peccaries are often met, occasionally the jaguar, sometimes the puma; likewise that toothless curiosity the great bear, long in claw, long nosed and remarkably long tongued. Very plentiful, too, are the huge night hawks in really armor, the quaint, waddling armadillos. Long footed jacanas pace about upon the floating lilies. A familiar object is the great jabiru, a stork with a preference for the lagoons, where it may often be observed statueque on one leg and wrapped in prolepsion.

Big Tip For Little Favors.

"It is surprising," said a veteran Pullman porter, "how big a tip a porter sometimes gets for doing a very little thing." He explained:

"A passenger once tipped me extra because he said I did not leave his shoestrings coiled up inside his shoes. I had blacked them. He said nothing made him madder than to slip on his shoes in a hurry in a sleeper only to find that he had to take them off again because the shoestrings were inside. Ever since that time I have been careful not to leave shoestrings inside of the shoes I black, and more than one passenger has thanked me for being thoughtful. But it wasn't me that did the thinking. The tip did that for me, and I never forgot it."

In the Right Direction.

Bishop Blomfield was one of the many witty Englishmen whose good things have found their way into a volume of reminiscences. "Leaves From the Notebooks of Lady Dorothy Nevill."

Bishop Blomfield was led into a controversy one time with a learned man as to the mental superiority of the male to the female and his opponent as a parting shot said:

"Well, at any rate, you can't dispute that the wise man came from the east."

"Surely that was the wisest thing they could do!" retorted the bishop.

A Futile Boast.

"Love me and the world is mine," he said.

"What's the use of saying that?" she replied. "I've been loving you for weeks and you haven't even succeeded in getting a good job."

Marriage is a lottery in which men stake their liberty and women their happiness.—Mme. de Rieux.

## SELLING CLOTHING.

Old Time Ways and Those of the Present Day—Traveling Model.

Time was when the traveling salesman for a wholesale manufacturer of men's clothing carried with him on the road as many as fifteen or twenty trunks containing made up samples. In those days he took along with him an expert packer from the factory to unpack the trunks when they hit a town and to pack them in readiness for the next jump.

The present day traveler for a wholesale manufacturer of men's high grade clothing carries with him just two sample trunks, one a wardrobe trunk and the other what is called a swatch trunk. In the wardrobe trunk he carries suspended on suitable hangers fifteen or twenty made up suits. Carried thus, these sample garments keep in good condition and show for what they are and to the best advantage.

In the swatch trunk the salesman carries samples of all the other fabrics that his concern is making up. Swatch is a trade name for a sample cloth 9 by 12 inches. Of swatches the salesman may carry hundreds, and he carries besides some scores of ends of cloth, an end being a piece cut off the entire width of the cloth.

Of swatches and ends the salesman has a trunkful, and with fifteen or twenty made up suits to show styles and workmanship and thirty-three swatches to show fabrics he can show goods to better advantage than from a bewildering assortment of hundreds of made up suits.

Of course the man on the road with clothing does not in these circumstances require a packer, but the present day traveler for a concern making only high grade clothing does take with him a model on whom to exhibit clothes for the better display of the made up sample garments he carries and to show just how they will look when worn.

What is considered the standard model in the clothing trade is a man five feet eight inches in height, thirty-six inches chest measure and thirty-two inches waist. He must of course be well built and otherwise of correct proportions. If a model five feet nine inches in height were required he would need to be thirty-seven inches chest measure and thirty-three waist.

The model must be young or comparatively young. He does not need to be handsome, but he must be of good bearing, of intelligence and of good sense.

If the salesman is an able man and the model himself is a man with ability in him, then by observation and experience the model absorbs and develops the art of salesmanship, and he may become a salesman himself and come to have a model to try on clothing for him.—Cleveland Plain Dealer.

One Cure.

"I believe I'll rock the post," declared the man in the stern.

"Don't do it," advised his companion. "It might discharge this unloaded pistol I have in my jeans."

Happiness is in doing right from right motives.—Margaret of Navarre.

The Legend of the Dolphin.

A rich Bristol merchant was coming home from the West Indies in a vessel which contained all his wealth, says a London paper. When far from land the ship sprang a leak. The crew tried hard to keep her afloat by pumping out the water. The water was coming in faster. Although they worked at the pumps day and night, yet it seemed as though the ship would sink. All at once, to the great astonishment, the water stopped coming in, and the ship was pumped dry. On examination of the bottom of the vessel it was found that a dolphin had come aboard in destruction. Out of gratitude the merchant founded a charity school in Bristol, and all the scholars wear on their breasts the figure of a dolphin in brass in remembrance of this remarkable del variance.

Nature's best food supplies in digestible form the elements necessary to build up the human body and fortify it against disease.

Biscuits and Milk for Breakfast. Triscuit Toast for Luncheon.

SOLD BY ALL GROCERS.

## TO PREVENT A NERVOUS BREAKDOWN

Take Dr. Williams' Pink Pills  
When the First Symptoms Are  
Noticed and Save Yourself  
Much Suffering.

Are you troubled with pallor, loss of spirit, waves of heat passing over the body, shortness of breath after slight exertion, a peculiar skipping of the heart beat, poor digestion, cold hands or feet, or a feeling of weight and fulness? Do not make the mistake of thinking that these are diseases in themselves and be satisfied with relief for the time being.

This is the way that the nerves give warning that they are breaking down. It means that the blood can become impure and thin and cannot carry enough nourishment to the nerves to keep them healthy and able to do their work.

There is only one way to prevent the final breakdown of the nerves and the more serious diseases which follow. The blood must be made rich, red and pure, and Dr. Williams' Pink Pills is the only medicine which does this promptly and effectively.

Every dose of this medicine helps make new blood and strengthens the weak or worn-out nerves.

Mrs. David J. Tapley, Fredericton, N. B., was cured by Dr. Williams' Pink Pills after suffering from nervous breakdown, which resulted in partial paralysis of the face. She says: "The trouble came on quite gradually, and at the outset I did not pay much attention to it. It grew more serious, and there was a general breakdown of the nerves, which was followed by partial paralysis of the face, one side being completely drawn out of shape."

Under a doctor's care for a couple of months, and one treatment after another without success, I was told by this time I was confined to my room and the doctor told me he could not cure me. Almost in despair I was persuaded to try Dr. Williams' Pink Pills.

The improvement was slow, but the building up of a run-down nervous system came quite slowly. Slowly but surely this medicine did its work, and after a time I was able to again come down stairs from that time on the improvement was much more rapid and now I am as well as ever I was in my life.

My friends and family are now as almost miraculous. Dr. Williams' Pink Pills did for me what the best medical treatment failed to do—they brought me back to health.

It is the blood building, nerve restoring power in Dr. Williams' Pink Pills that enables them to cure the troubles as anæmia, rheumatism, the after effects of the grippe, indigestion, neuralgia, St. Vitus dance, partial paralysis and the several ailments of girlhood and womanhood. Sold by all medicine dealers or by mail at 50c a box of six boxes for \$2.50 from Dr. Williams' Medicine Co., Brockville, Ont.

"And you will live in a flat during the summer?"

"Yes."

"Won't you miss the joys of the country?"

"I don't think so. I have invented a carpet sweeper that makes almost as much noise as a lawn mower."

Washington Star.

### HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

P. J. CHENEY & CO., Toledo, O. We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

Walding, Kinnan & Marvin, Wholesale Druggists, Toledo, O. Hall's Catarrh Cure is a perfect remedy, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all druggists.

Take Hall's Family Pills for Constipation.

"Charley, dear," said young Mrs. Torkins, "I had a dream about a race horse that won three times in succession."

"Great Scott!" answered her husband, who has a touch of superstition. "What was the name; what did it look like?"

"I've done my best to remember, but I can't."

"That's the way! There never was a woman who could be relied on to keep her head in business matters!"—Washington Star.

## Non-alcoholic Sarsaparilla

If you think you need a tonic, ask your doctor. If you think you need something for your blood, ask your doctor. If you think you would like to try Ayer's non-alcoholic Sarsaparilla, ask your doctor. Consult him often. Keep in close touch with him.

## CLIMBING AN ICE SLOPE

Vain and Perilous Effort to Scale Mount McKinley.

The long trail to the north brings out the best in men and the worst declares Mr. Robert McKinley. "This is the Diary of an Explorer." As a member of a party which made a vain attempt to reach the top of Mount McKinley he tells something of the hardships of one day's travel.

Fortunately, imperceptibly, the steepness had stolen a march on us. As one time of footholds gave out we had to slide dexterously to another. The steeper slope was swept clear and hard. Steps had to be cut.

We have only three ice axes. As I never gave them a thought this morning, all of them were gobbled up when we started, and I was left with only one long willow tent pole. It was never meant to balance you in half cut steps that may or may not hold your toes.

As the steps changed from a stairway to a steeper and other the snow betrayed no existence, no meanness. Neither did I at first, but I felt both. It was not dizziness, not vertigo, but simply that as I looked down the sheer precipitous face of the mountain, my toes imagination restlessly told over how it would feel, how long it would last, what the climax in sensation would be, were I to fall.

As our successful march I tried each minute only to make the false step. Courage is only a matter of self control anyway.

Climbing the highest mountain on the continent with a tent pole. Some times I bolted in those dizzy, anxious places that I had put myself in such a position with such men. Yet I must keep my own head. Once I asked if it wasn't customary to rope on such steep slopes, but no one but Fred answered, and he said: "Y' ain't got to keep me tied up to anybody. A man don't want to be chained to a rope, but one but himself, haulin' him down from these places."

One requisite of explorers besides aversion to soap and water is luncheon. They couldn't do these stunts if they did.

## THE HUMAN BRAIN.

It is the Most Marvelous Machine in the World.

The human brain is the most marvelous machine in the world. It occupies a space in proportion to its capabilities to think, to feel, to invent. It sends a special nerve to every ultimate fiber of some 500 muscles, to many thousand branching veins and arteries, to every part of the area of the numerous glands which keep the machine properly oiled, heated or cooled, to some sixteen square feet of skin, which is the outpost of the machine to the outside world.

What the point of a pin cannot do an area unperceived of it possesses special quarters for the reception and translation of the impressions of the world. It is the product of all the things movable or still in the outer world. On the retina of every eye is a picture of the outer view, a focused imprint of every ray of light and color, and in the visual chamber of the mental palace stands a vibrance, a magnetic force, that receives the retinal picture in its billion speckled series of light waves and throws them upon its mental screen as a living moving picture of light and shade and color.

It is the brain that receives the vibrations that are the product of all the things movable or still in the outer world. On the retina of every eye is a picture of the outer view, a focused imprint of every ray of light and color, and in the visual chamber of the mental palace stands a vibrance, a magnetic force, that receives the retinal picture in its billion speckled series of light waves and throws them upon its mental screen as a living moving picture of light and shade and color.

## CHILD'S SEVERE BURNS HEALED BY ZAM-BUK.

The little girl of Mrs. Lewis Best, of Carlisle, P.O., recently fell from the stove and burned her forehead very badly.

Mrs. Best says: "This burn was about the size of a fifty cent piece and was near the bone. It made my little girl's face swell till it almost got out of her head. It began to run matter very badly and I could not stop it, although I bathed it good every day and morning. At last I sent for some Zam-Buk which soon stopped the matter and very quickly healed the wound. I have never seen a burn heal so quickly, and I am sure Zam-Buk has no equal for curing cuts, or burns, and I shall always keep a box on hand in case of emergency."

Every home needs Zam-Buk! All diseases of the skin quickly yield to it. It is also an excellent remedy for piles (blind or bleeding), rheumatism, etc. All druggists and stores 50 cents a box, or postpaid from the Zam-Buk Co., Toronto.

"Do you know, young man, that it's the pace that kills?"

"Certainly, I'm a chauffeur."—Browning's Magazine.

A Power of its Own.—Dr. Thomas' Catarrh Oil took a power of its own that other oils cannot pretend to, though there are many pretenders. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been the most leading liniment for man and beast.

"What sort of a telescope do you use for seeing things on Mars?"

The eminent astronomer, habituated to scanning the heavens at magazine space rates, stayed his pen but an instant.

"I have learned," he replied, "not to rely on any telescope. The best of them sadly hampers the play of the imagination."—Philadelphia Ledger.

## Psychine Missionaries

A friend of Dr. Slocum Remedies writes: "Send a bottle of Psychine to Mrs. W. They have a daughter in decline, and I believe it would help her. I have mentioned your remedies to the family, and also cited some of the miraculous cures accomplished by them in the last 15 years, of which I have knowledge."

T. G. IRWIN, Little Britain, Ont. Dr. Slocum Remedies, 50c and \$1.00, or Dr. T. A. Slocum, Ltd., Toronto.

Office Boy.—What am I fired for? Employer: "You are constantly smoking cigarettes. You have heard, haven't you, that where there is so much smoke there must be some fire?"—Bohemian.

Minard's Liniment Co., Limited. Dear Sir:—Your MINARD'S LINIMENT is our remedy for sore throats, colds and all ordinary ailments. It falls to relieve and cure promptly.

CHARLES WHOOTEN, Port Mulgrave.

Citizen.—You ought to know something about flora and that sort of thing. Tell me, what is a "forget-me-not?"

Subsue.—Yell, it's a piece of string that your wife ties around your finger when you go into town on an errand.—Philadelphia Press.

Worms up the strength and undermine the vitality of children. Strongly then by using Mother Graves' Worm Extirminator to drive out the parasites.

Getting Even with Fra Elbertus. Elbert Hubbard says he was near the end of his life before he was cured of a bad cold by using Mother Graves' Worm Extirminator to drive out the parasites.

"My God," said the superintendent to Mr. Hubbard "the first sign she has shown of returning sanity."—Success Magazine.

## To Purify The Blood

The liver and kidneys must be enlivened by Dr. A. W. Chase's Kidney-Liver Pills.

The blood not only carries nourishment to the cells and tissues of the body but also carries up the poisonous waste material or ashes which remain from the fire of life.

These poisonous substances can only be removed from the blood by the liver and kidneys and this accounts for the extraordinary success of Dr. A. W. Chase's Kidney-Liver Pills as a means of purifying the blood.

By acting directly and specifically on these organs, this medicine causes regular and healthful action of the bowels and a thorough cleansing and invigorating of the whole digestive and excretory systems.

The blood is purified, digestion improves, the vital organs resume their various functions, bile, acids, constipation, liver complaint and kidney trouble are overcome and rheumatism, headache, and all pains disappear.

There is no treatment so prompt and certain and none so reasonable as this. One pill a dose, 25 cents a box. All dealers or Edmondson, Bates & Co., Toronto, Ont. Postal and signature of A. W. Chase, M.D., the famous Receipt Book author, on every box.

## The March of Profanity.

The marching of 14,000 members of the Holy Name Society through the streets of Holytown, N.J., as a protest against profanity was an impressive reminder of a widespread evil in America.

The surest of professions is language is an ugly habit. Some men are thoughtlessly profane, others are in the habit of using bad language as a habit and one which answers no good purpose. It may be that such organizations as the Holy Name Society can alter the common view and break up a bad habit. Ugly words soil the tongue; more than that, they soil the mind and force the mental tendency should be upward, toward higher, nobler and holier things. The man often lives as he thinks; thus, the profane speaker of thought and lives profanely, and this is a social tragedy.—Seattle Post-Intelligencer.

The finest tea grown in the world is the standard of quality used in preparing "Salada" Tea. Sold only in sealed lead packets.

Mr. Kipling tells a story about a smart man who owned a dry goods store, and one day heard a new clerk say:

"No, madam, we have not had any for a long time."

Mr. Kipling's smart man at the clerk the smart employer rushed up to the man and said:

"We have plenty in reserve, ma'am, plenty."

Lady and clerk looked dazed, and afterward the smart proprietor learned that the clerk's remark had been made in answer to the woman's "We haven't had any rain lately."—New York Tribune.

"Canvassers must go to the rear door."

"But I am not a canvasser, miss. I am sent here by the agent of the building to take measurements for putting awnings over the windows on the sunny side of the house."

"If putting up window awnings isn't canvassing, I'd like to know what is."—Chicago Tribune.

Ask for Minard's and take no other.

Struck on the head with an egg while addressing an audience at Croton public hall on Tuesday night, Mr. Guyman, M.P., declined to be disturbed by "the softly yielding argument which has impinged itself against my cerebellum."—London Daily Mail.

Relief for Suffering Everywhere.—He whose life is made miserable by the chronic constipation that comes from indigestion and has not tried Parmenter's Vegetable Pills does not know how much better he may feel.

With these pills will relieve where others fail. They are the result of long and careful study and are completely put forward as a sure corrector of disorders of the digestive organs, from which so many suffer.

Mr. Singler.—Do you know that new tune just hums me.

Mr. Singler.—You are kidding—after the way you murdered it.—Smart Set.

WE PAY HIGH PRICES FOR FURS and hides, or tan them for robes, rugs or coats. N. W. Hyde & Fur Co., Minneapolis.

"Do you think that horrid story about Beatrice is true?"

"I heard it from her dearest friend."—Life.

A Purely Vegetable Pill.—The chief ingredients of Parmenter's Vegetable Pills are mandarin and dandelion, sedative and purgative, but perfectly harmless in their action. They cause no pain and have a most healthful effect upon the secretions of the digestive organs. The dyspeptic and all who suffer from liver and kidney ailments will find in these pills the most effective medicine in concentration for the relief of the suffering.

Tody.—Jennie tells me that young Woody proposed to her last night.

Viola.—I don't think I know him. Is he well off?

Tody.—Certainly is. She refused him.—London Tit-Bits.
